

USDA NOP Certificates

All O&3 organic offerings are available as USDA Certified Organic through the USDA National Organic Program (USDA NOP).

The USDA NOP allows our company to import certified organic materials into the USA using the certification we hold. This certification is 100% in conformity and equality with USDA NOP you might be accustomed to.

USDA NOP certificates are issued on a batch/lot specific basis. To obtain this we process a transaction certificate at the time of shipment, which is then validated by our certifier, and a certificate is generated. You the customer then file this transaction certificate (we send you) and show your auditor when they audit your company.
